

SPECIFICATIONS

- 700 sq/ft greenhouse 30 x20 dome.
- 4' sunken floor level without a separate foundation.
- Steel frame and redwood plates.
- Choice of coverings from film, polycarbonate or glass.
- *Vestibule option* - is made partially from the left over lifting system pipes.
- *Cold weather option* - 18" blown air space envelope with 6mil IR/AC film
- *Polycarbonate option* - Our process heat seals the flutes. We add silicates to trap moisture.
- Film 6 mil clear or white lasts 4 years.
- Glass tempered or wire reinforced depending on location
- Frame guarantee for 25 years.

Future Spaces, Inc introduces the Breathe Green Dome - Series 300 inspired from building a complete sphere in Colorado's San Luis Valley.

Now you can have all the benefits of a 4 foot lowered main level, without the added expense of a complex foundation. This portable greenhouse is partially buried so you can grow year-round in cold climates without incurring excessive heating costs.

This breakthrough design eliminates costly foundations -- there are no stem walls, footers, concrete or anything permanent thus making it exempt from building permits. This design has many advantages: you can use the constant heat of the earth's 58 degrees, by having the floor level 48" below grade there is no need for concrete and rebar, this makes the grow dome transportable and inexpensive. The design is 100% wind proof and earthquake proof.

By assembling from the top down with a unique lifting system many people will be able to build their own greenhouse.

PACKAGES

- ① **Frame Only** - All the steel struts, redwood plates and hardware to build a 5/8 sphere 30'X20", call for freight pricing.
- ② **Sto Dome: Frame package + Backfill package** includes: strut reinforcement Wire mesh insulation vapor barrier and vestibule kit cover is recycled lumber wraps.
- ③ **Greenhouse: Basic winter package**, 6 mill white or clear 4yr. outside film and the IRAC 6mil. infrared/anti condensate. Backfill package and Vestibule package.
- ④ **Greenhouse Plus: The above package with tripled glazed polycarbonate.**
